

Michael Grimm

impression skin relatively rare

3 dimen (dirt / snow) etc
inc depth

2 dimen. on leg

usually 3 dimen is post-mortem

here - obj - some ability to pull
moisture from surface

fingerprint powder attrac. moisture
superficial - magnet w/ moisture

enhances

stabilizes

skin - very moist

shoe took moisture away

when print powder applied ~~then~~
adhere where moist

see powder in photo

unusual to have dried like this
to show up

non-porous item wouldn't have
some capability

if one contact - only be pronounced
area of object that made
impression

muscular area so contact pressed
deep into skin as dry, crust, etc

this
supplied
printed

Resubmit to Roaruke -
to make a dinner impression
now that DNA done

consistent w/ straddling w/ kneeling
down leg

indiv - unique to object via wear
some marks - class (for stage)
but when new wouldn't have
marks

to be rolled up
tear - front

ex seam

New Balance
- Contact N. # slides
etc.

edge roll -
stippling -
unique to size
to mold.

if could narrow
to specific mold
or # - percentage #

marks on color photo:

leather wristband - corresponds exactly

(When found her - no shoes on
